

Lecture given at the

**WCS Workshop on Land Change Modeling for REDD**

October 25– 29, 2010

Wildlife Conservation Society - Bronx Zoo  
Bronx, New York, USA

Hosted by

Clark Labs and the Wildlife Conservation Society

This workshop was generously supported by the American people through the United States Agency for International Development (USAID), under the terms of the TransLinks Cooperative Agreement No.EPP-A-00-06-00014-00 to the Wildlife Conservation Society (WCS). TransLinks is a partnership of WCS, The Earth Institute, Enterprise Works/VITA, Forest Trends and the Land Tenure Center. The contents are the responsibility of the authors and do not necessarily reflect the views of USAID or the United States government.

# Taiga

idrisi

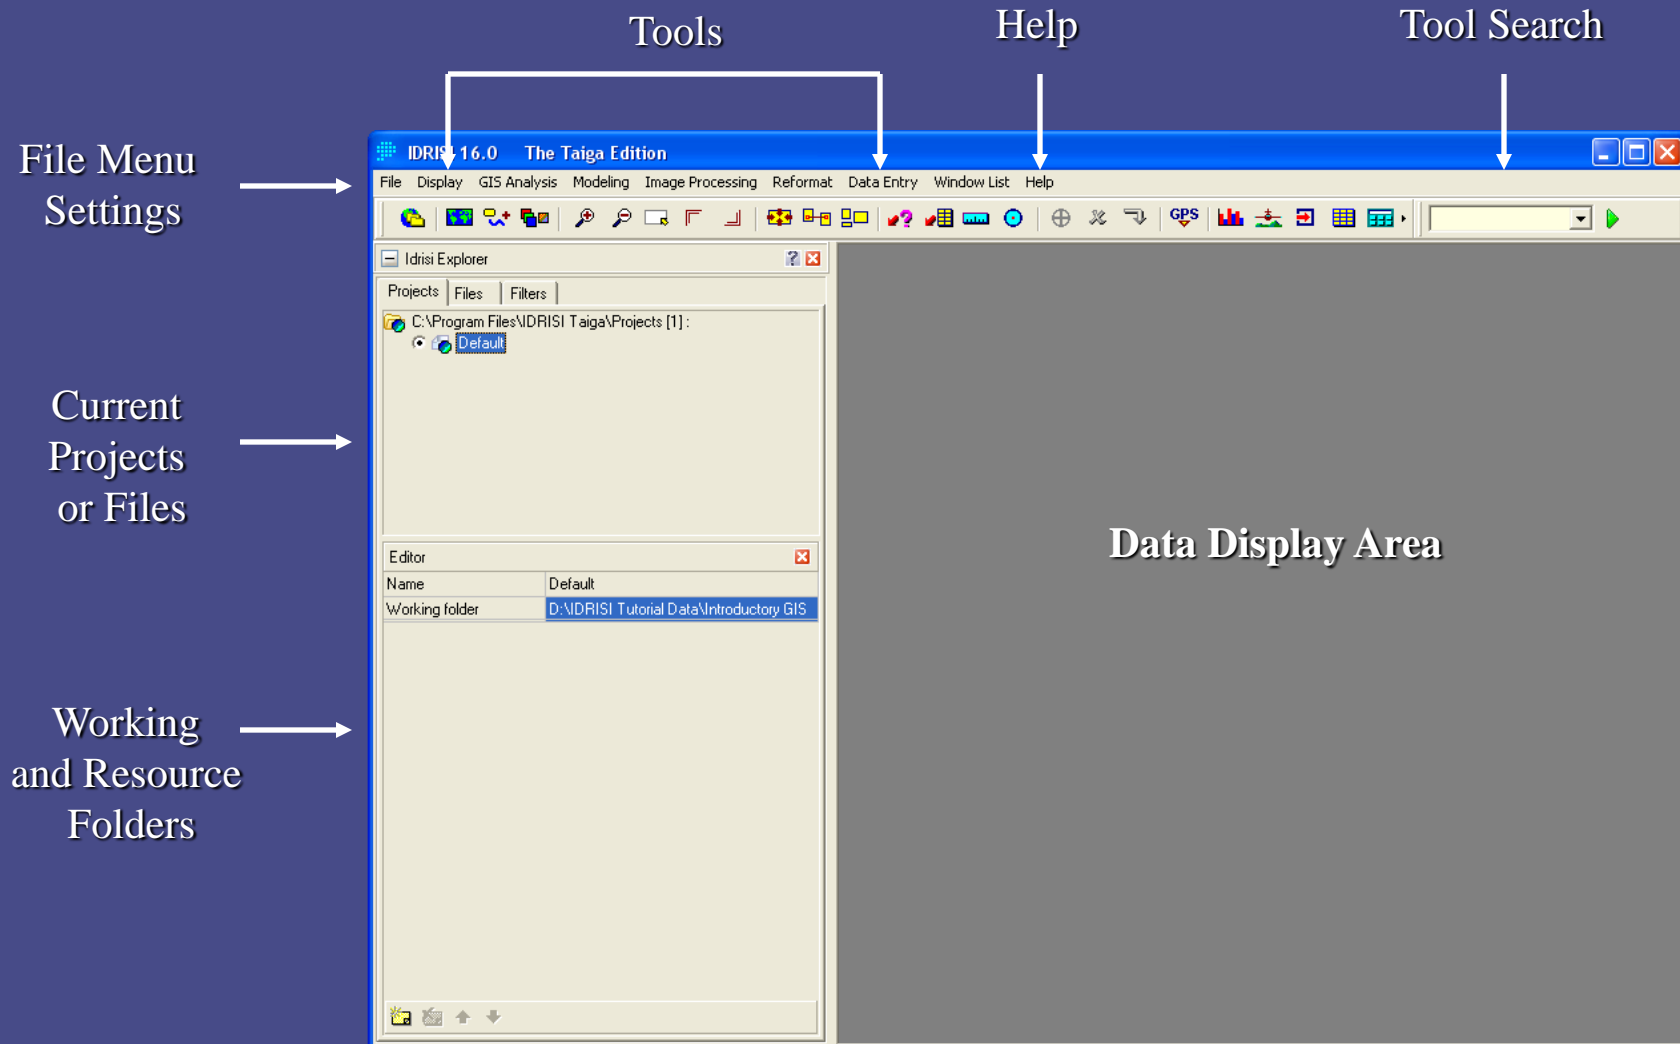

# Overview of Idrisi Taiga

---

In this section you will learn:

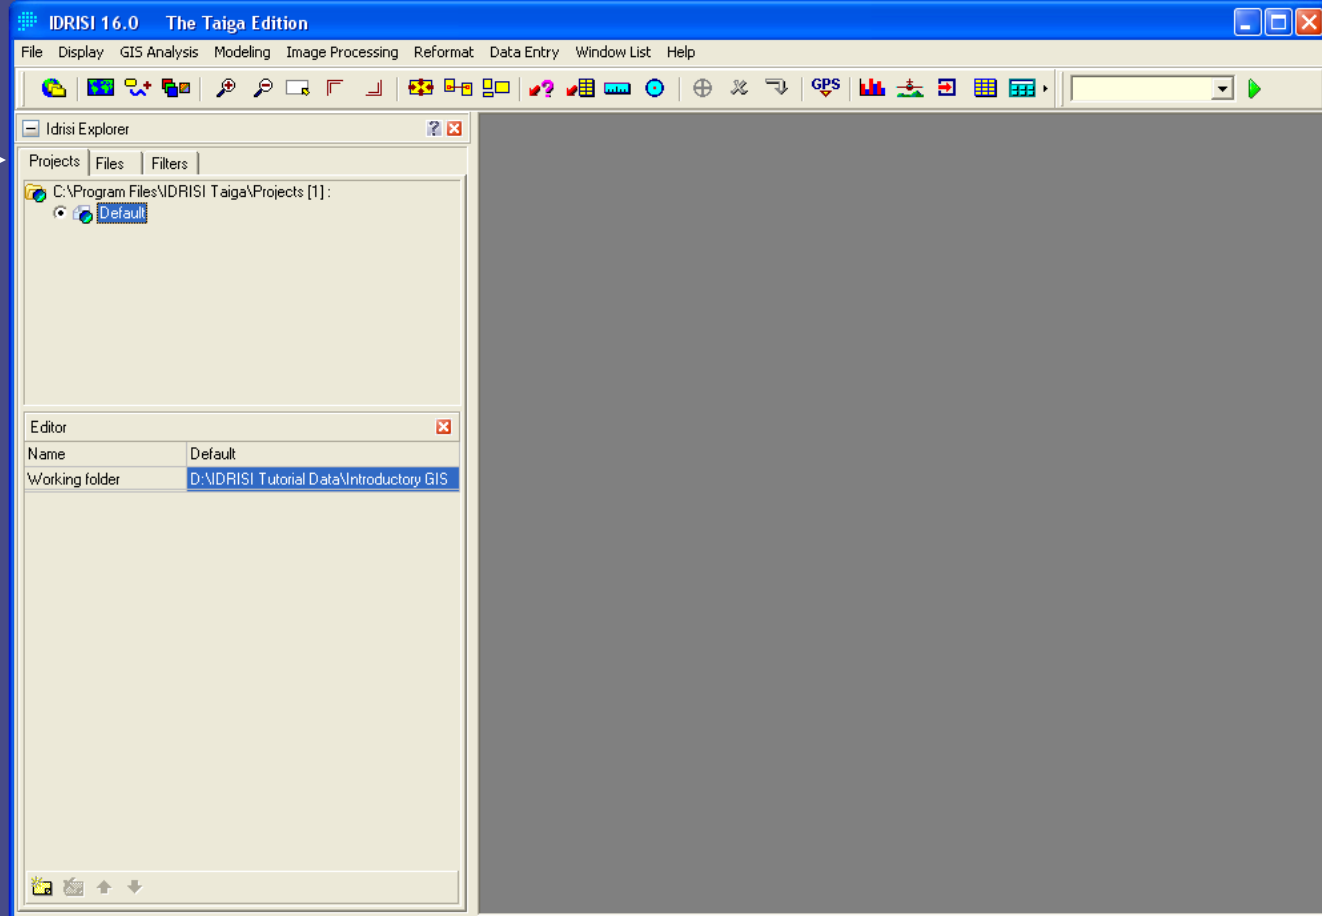

- Idrisi Taiga Interface
- Starting a New Project
- Data Display
- How to Access Taiga Tools

# Idrisi Taiga Interface

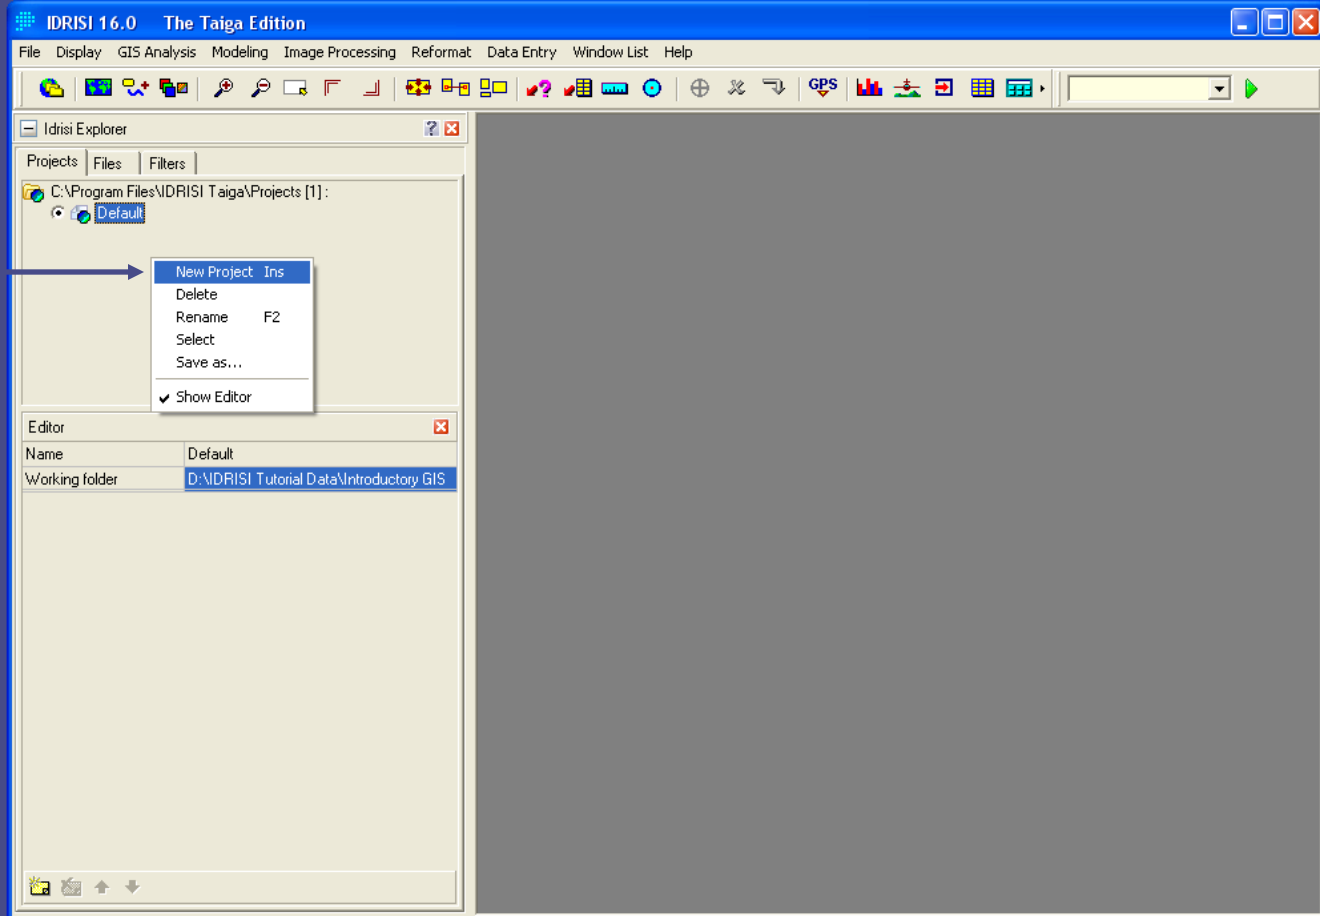

# Starting a New Project

1. Click on  
Projects Tab

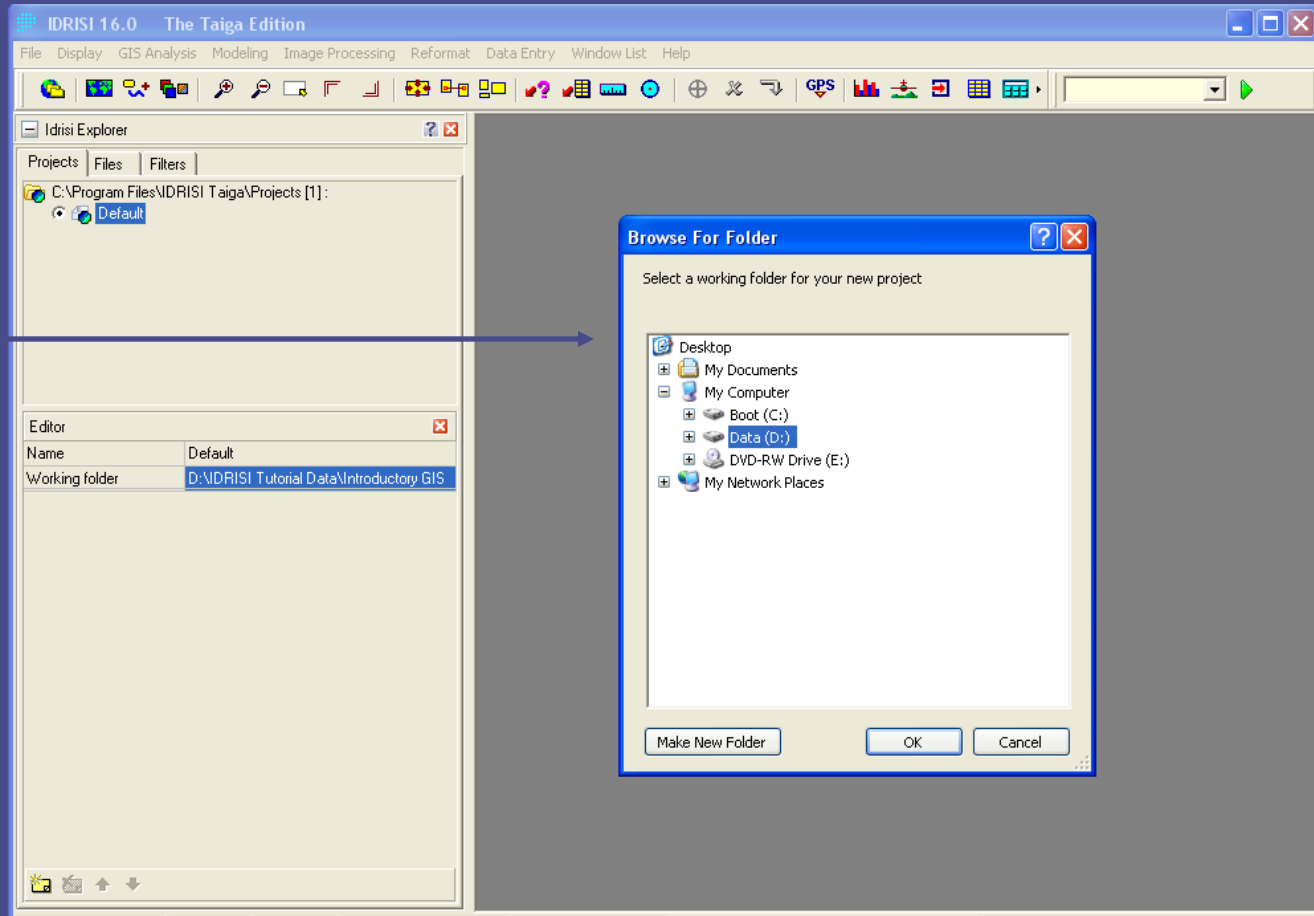

# Starting a New Project

2. Right Click and  
Select *New Project*

# Starting a New Project

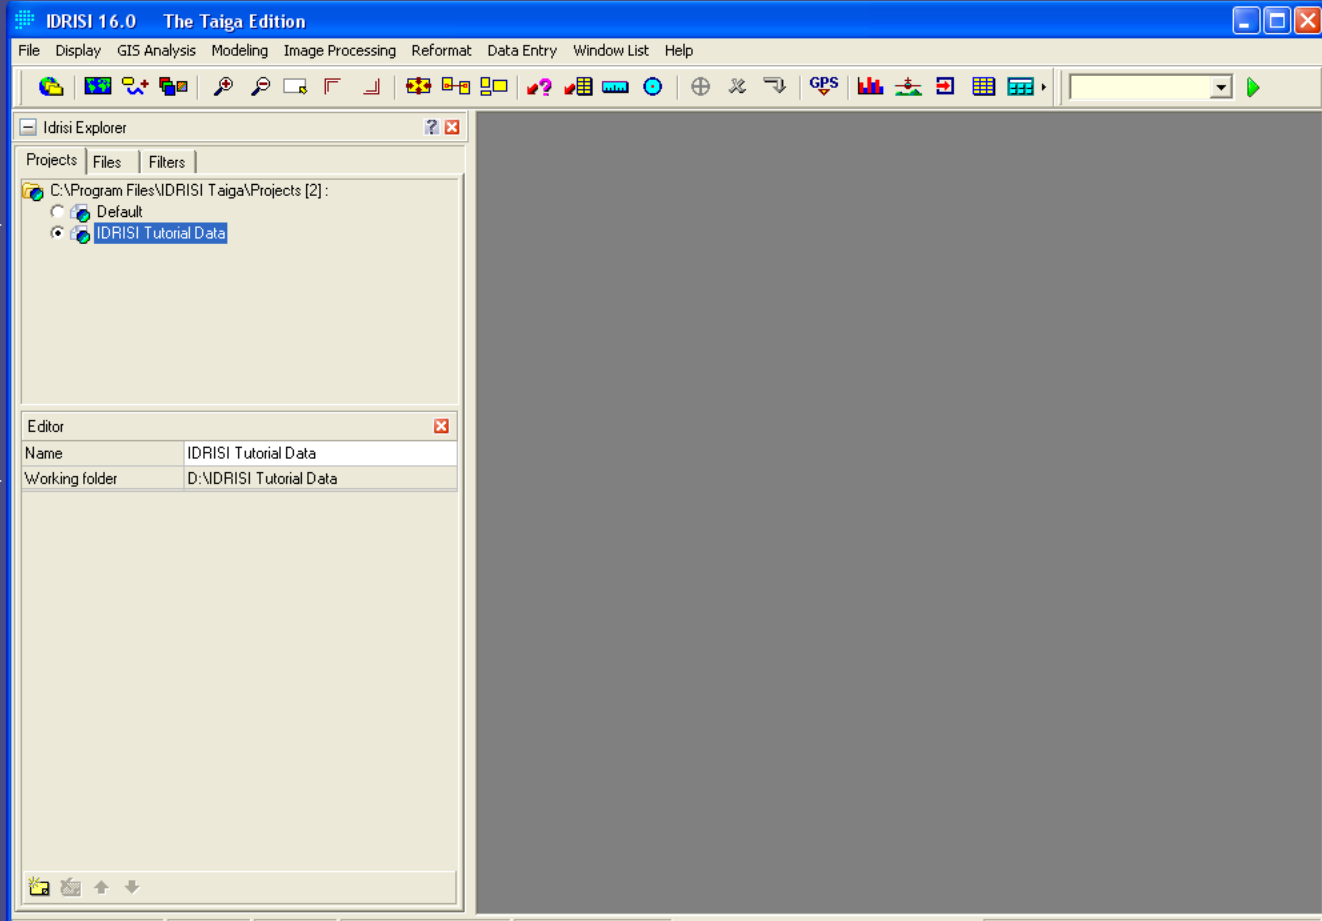

3. Choose the folder where you want data to be saved, or make a new folder

# Starting a New Project

4. The new project appears in the list of current projects

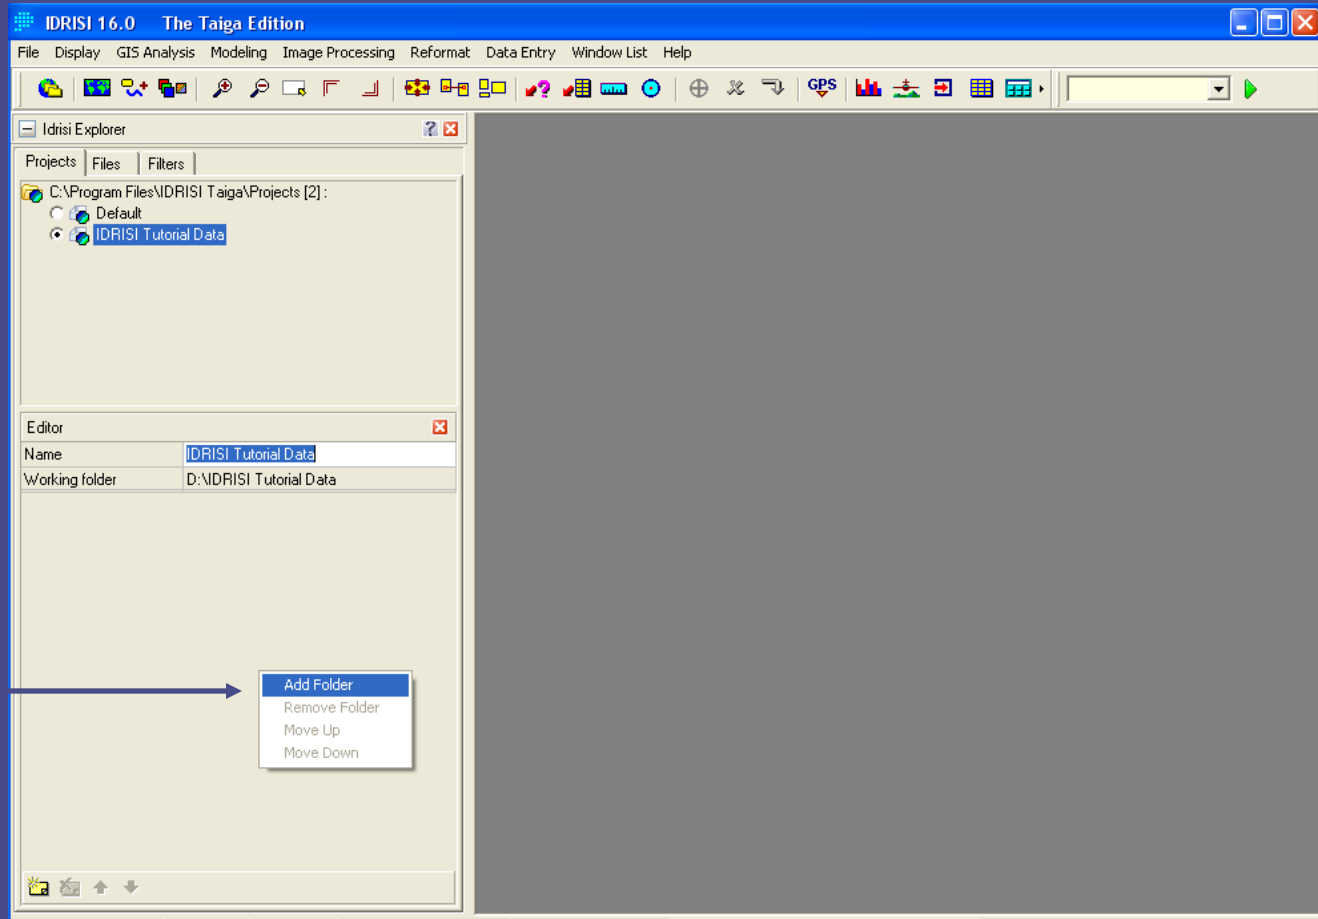

5. The folder you chose appears as the Working Folder

# Starting a New Project

6. Folders containing other data for your project can be added as Resource Folders by right clicking and selecting *Add Folder*

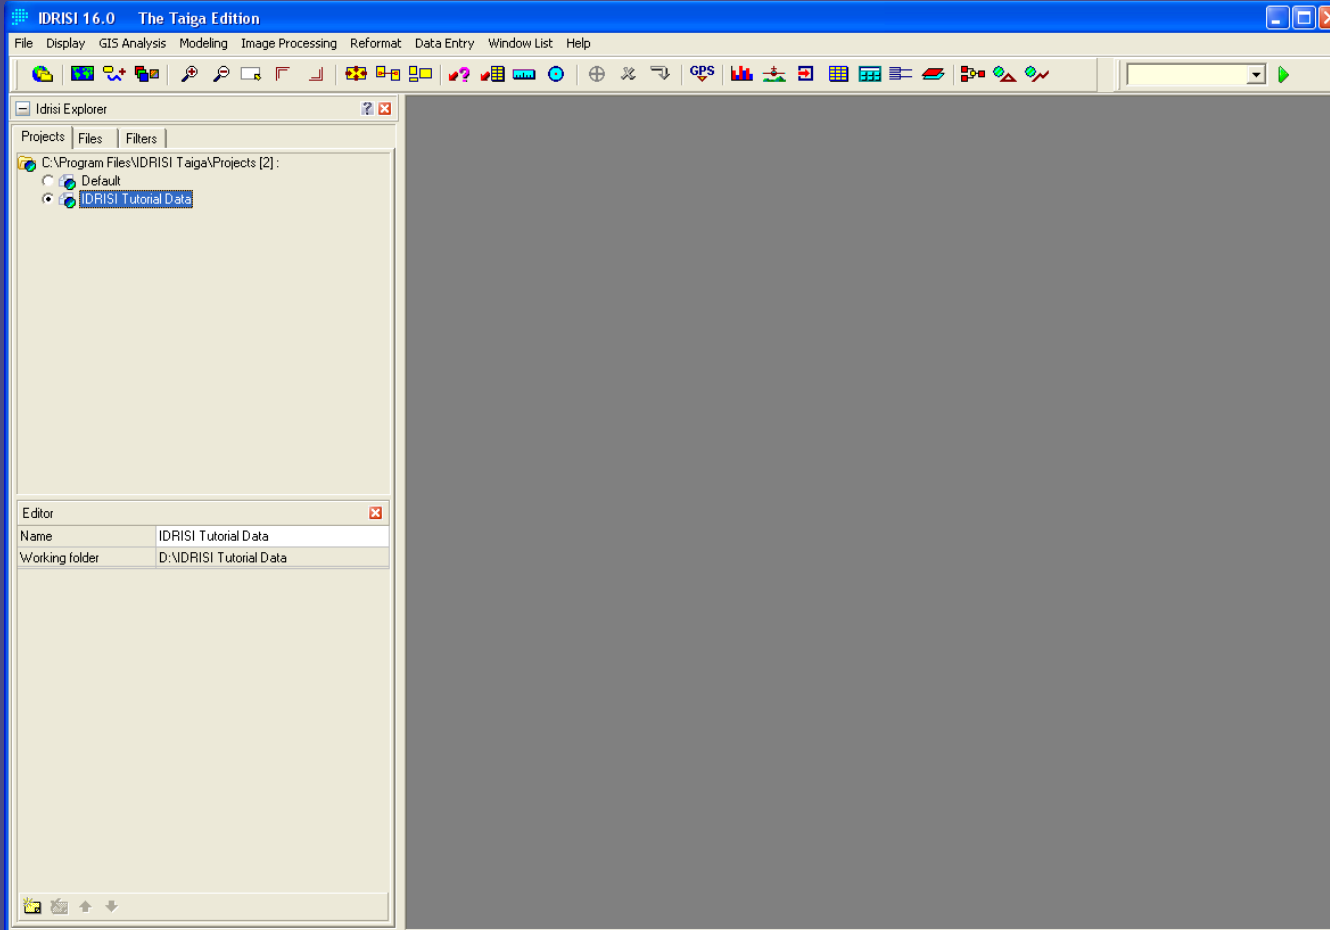

# Starting a New Project

---

-  Task: Start a new project using the WCS\_workshop\_data\results folder as your working folder
-  Task: Add as your resource folders:
  - Input\_Raster
  - Input\_Vector
  - Results\_MLP
  - Results\_LR
  - Tiff
  - Shp
-  Task: Your project will be automatically named “Results.” Rename your project as LCM\_Training.
-  Task: Click on the Files tab and explore the data in your folders. Double click on the Input\_Vector folder. You can see the .vct files in this folder. At the bottom of the window type in ,\*.\* to show all data types. Hit F5 or right click and go to refresh to see the other files in this folder.

# Data Display

Data can be displayed using either the Display Launcher or by double clicking a file.

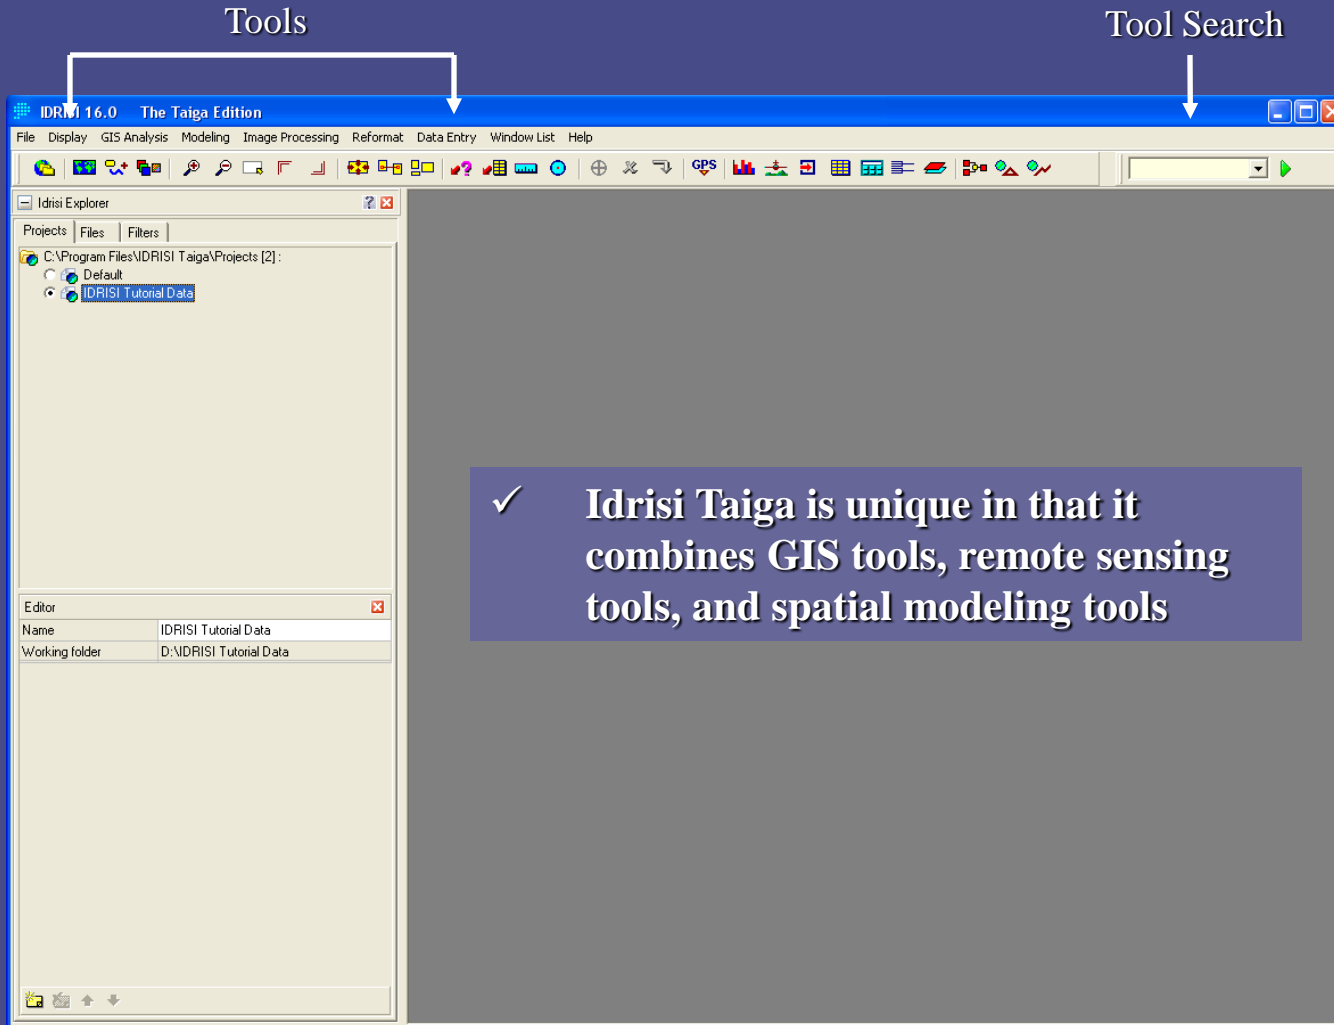

# Data Display

---

-  Task: Open the Display Launcher, navigate to your Input\_Raster resource folder and select 60m\_landcover\_1998\_rc.rst. Choose to display as qualitative and click ok to open your image.
-  Task: Double click on the 60m\_landcover\_1998\_rc.rst file in the Input\_Raster resource folder to open the image.
-  Task: Use the zoom tools and cursor inquire to investigate this image.

# Taiga Tools

Tools in Taiga can be found within menus or using the tool search

# Taiga Tools

---

—  Task: Open the Reclass tool in the GIS Analysis > Database Query menu

Close the tool and search for Reclass in the tool search. Push the green arrow or hit enter to open.
